JSON Canvas spec test

Every node type, group option, colour and edge option in JSON Canvas 1.0, for testing canvas -> PDF (MAK-233).

Text cards

bottom -> top

Markdown card

Bold , *italic* , ~~strike~~ , highlight , `inline code` .

- bullet
  - nested bullet

1. ordered

- [ ] open task
- [x] done task

```
const x = 1;
```

> quote

external link and wikilink

preset colour 1

Plain paragraph with no markdown at all. It should wrap inside the card width and keep the card's height.

Literal backslash-n stays on one line: a\nb

A real newline came before this line.

Overflow card

This card is deliberately far too small for its text. Sentence 1 keeps going so that the card cannot hold it

Continued on page 2 ->

Unicode: café, naïve, em dash —, arrows →, CJK 漢字, check ✓, emoji

A long edge label that should wrap or be truncated when it is rendered

hex colour, crosses groups

Colours

Presets 1-6 (nested group)

1 2 3 4 5 6

Hex colour #7c3aed

Hex-coloured group

Card with no colour inside a hex-coloured group

does-not-exist.md

three-pages.pdf

three-pages.pdf

right -> bottom

Background: cover

Group with a label and a cover background

Unlabelled group, background repeat

no arrow, ends on a group

Background: ratio

Group with a ratio background

Overflow card

Overflow card

This card is deliberately far too small for its text. Sentence 1 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 2 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 3 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 4 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 5 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 6 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 7 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 8 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 9 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 10 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 11 keeps going so that the card cannot hold it even at the 60% shrink floor. Sentence 12 keeps going so that the card cannot hold it even at the 60% shrink floor.

- the PDF should show a clipped excerpt
- and link to a continuation page
- which links back here

Canvas spec note

Canvas spec note

This note is embedded whole by one file node, and by heading and by block in two others.

First heading

Text under the first heading. It should **not** appear in the heading-subpath card.

- list item one
- list item two

Second heading

Only this section should appear in the card whose subpath is `#Second heading`.

> A quote inside the second section.

Third heading

This paragraph is the target of the block-subpath card. ^key-block

This paragraph follows the block and should not appear in that card.
